

Internet Browser Requirements for AIA's Sourcing platform

- The Ivalua application is engineered as a 100% Web application and is device-agnostic as well as device independent. Ivalua application operates on all devices that support the browser configurations below.
- Ivalua application does not require installation on the supplier's computing device.
- It can be accessed by using a Web browser such as Microsoft Edge (Chromium), Internet Explorer, Firefox, Chrome or Safari, with no plug-ins required but **with Javascript enabled**.
- The certified browsers on the desktop include:
 - ✓ Edge (Chromium): the last 3 major releases
 - ✓ Chrome: The last 3 major releases
 - ✓ Firefox: The last 3 major releases
- Microsoft Office or other compatible suite is necessary on the device for managing Excel or Word documents.
- The I-Valua application works directly on all standard installations of Microsoft Edge. In case installations have non-default security settings (i.e., through Group Policies) administrators should verify/secure the following options:
 - Security setting (Internet Options / Security tab)
 - The application requires the use of JavaScript.
 - Confidentiality (Internet Options / Privacy tab)
 - The application requires non-persistent cookies.
 - Use the level "Medium-High" or lower.
 - If you choose to configure advanced privacy settings, enable accept Cookies.
 - Advanced settings (Internet Options / Advanced tab)
 - Use HTTPS 1.2: Yes (recommended)
 - Use HTTPS 1.2 through proxy connections: Yes (recommended)
 - TLS: Yes
